REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: It is believed that the applicant's arguments, in page 2, "In contrast, In Hartmann et al., light beam 5 enters element 2 at an angle that is apparently not different from the angle that light beam 16 exits element 13. Even if one considers elements 2 and 8, the entrance angle of light beam 5 into element 2 is apparently not different from the angle that the light beams exit element 8. Moreover, even if one considers elements 2 and 12, the exit angles of the light beams exiting element 12 are apparently not identical to each other. Nor are the indices of refraction of any of the elements 2, 8, 12 and 13 taught as being different from any of the others" are true. The prior art fails to teach a combination of all the limitations as claimed in the independent claim 1, wherein the claimed invention comprising the optical component contains at least two elements that exhibit at least two different refractive indices; and the entrance angle and exit angle are different; wherein the light beam bundle contains light of at least two wavelengths and wherein the exit angle is identical for the light of at least two wavelengths, as claimed. The prior art does not disclose or fairly suggest, by themselves or in combining with any other reference, to meet a combination of all the limitations as claimed in claims 1,12. Therefore claims 1-3,5-12,14-20 could be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
